Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over over Carstens et al. USPN 6582411. Carstens discloses a flexural resistance of between 30-50 g about as tested by the Modified Circular Bend Test, ASTM 4032-82 (col. 3, lines 62-66 and col. 31, lines 30-34). Carstens does not disclose the claimed flexural resistance of less than 30 g. However, Carstens discloses the general condition of providing a drapeable product. Applicant defines "drapeable" to mean having a flexural resistance of about 35 g or less as tested by the Modified Circular Bend Test, ASTM 4032-82 (page 3, lines 12-18). Applicant states in the specification that cotton underwear are known to have a flexural resistance of less than 35, page 3, lines 17-19. Therefore this value is known for an absorbent product. As to claims 24-29 and based on applicant's definition of drapeable, Carstens discloses an absorbent article comprising a comprising a body facing layer and a garment facing layer (Figures 1 and 4), wherein the article is drapeable. Therefore, it would have been obvious to one

having ordinary skill in the art at the time the invention was made to provide the absorbent article of Carstens with the claimed flexural resistance value of the present invention, since where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation, *In re Aller et al.* 105 USPQ 233.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
